

## KV-AJx

## MULTI-BAND ANTI-JAMMING GNSS RECEIVER

- Multi-band anti-jamming GNSS receiver: up to 3 frequency bands simultaneously (consider specified options)
- Multi-system solution: GPS / Galileo / NavIC (IRNSS)/ GLONASS / BeiDou can be used (consider specified options)
- Up to 100 dB J/S performance
- Small size: 137 mm × 111 mm × 23 mm
- Low power consumption: 5 W...12.8 W (depending on options)
- Support of up to 3 jammers simultaneously for each of frequency bands
- Receiver based on own NTLab's high-performance ASICs: RFFE, baseband, anti-jamming processors
- Up-converter RF output for external GNSS receivers
- Internal receiver with INS, RAW data and with velocity, acceleration option by request

Coupled with the use of a multi-band 4-element antenna array (the module can be provided by Kosminis Vytis), the tri-band solution allows to suppress interferences in up to 3 directions on 3 frequency plans simultaneously. This approach provides significantly higher protection against interference compared to single-frequency options. KV-AJx contains a MEMS inertial sensor and thus allows to create the GNSS-aided INS (GNSS+INS) solutions for position, velocity, time, and attitude. The jamming-free cleared RF signal can also be delivered to external non-protected GNSS receivers to obtain position, velocity, and time.

## **TECHNICAL SPECIFICATION**

Product code: KV-AJx.y-zz (x - band options, y - GNSS signal options, zz - Output options (RO - RF Only, DO - Digital Only, RD - RF+Digital))

Output options		Single-band	Dual-band		Tri-band	
output o	ptions	Option* 1.1	Option* 2.1	Option* 2.2	Option* 3.1	Option* 3.2

Parameter	Description	Note	
Interference rejection:			
Single interference	Up to 40 dB	For one CW signal of single jammer	
suppression	Up to 30 dB	For one AWGN signal of single jammer	
Several interferences	Up to 32 dB	For one CW signal of each jammer	
suppression (up to three)	Up to 23 dB	For one AWGN signal of each jammer	
Interference resistance:		,	
0. 1 .	Up to 90 dB (J/S)	With internal GNSS receiver	
Single jammer	Up to 100 dB (J/S)	With external third party GNSS receiver	
Several jammers	Up to 82 dB (J/S)	Up to three directions	
Anti-Spoofing Capability	YES	Hardware ready	
Number of channels	4	For each frequency band	
Operation modes:			
GNSS mode	Internal GNSS receiver	By default	
GNSS+INS mode	Internal GNSS +INS receiver with onboard MEMS sensor	Optional	
RF output	Up-converter	Clear L1, L2, L5 bands depending on option	
Positioning accuracy (RMS) with	out interference <sup>1</sup> :	· · · · · · · · · · · · · · · · · · ·	
- Horizontal	< 2.1 m	Static mode
